

How to adjust the length of Continuous Label Material

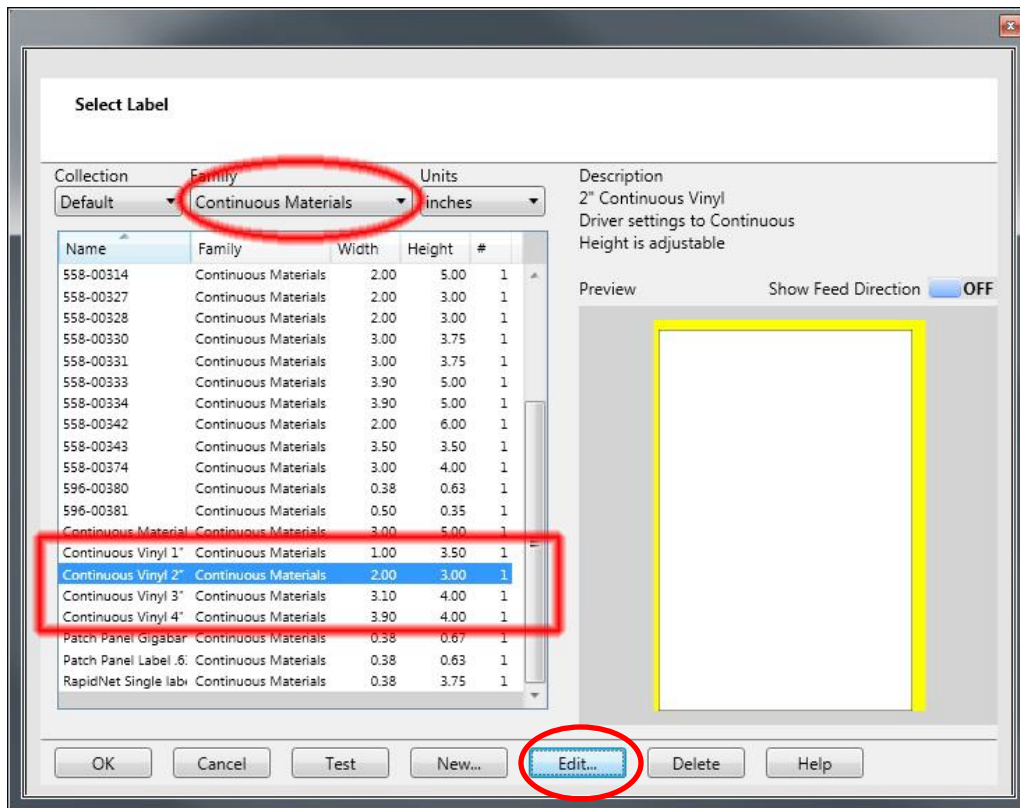

1. Open TagPrint Pro 3.0
2. Navigate to File>New>Label Design

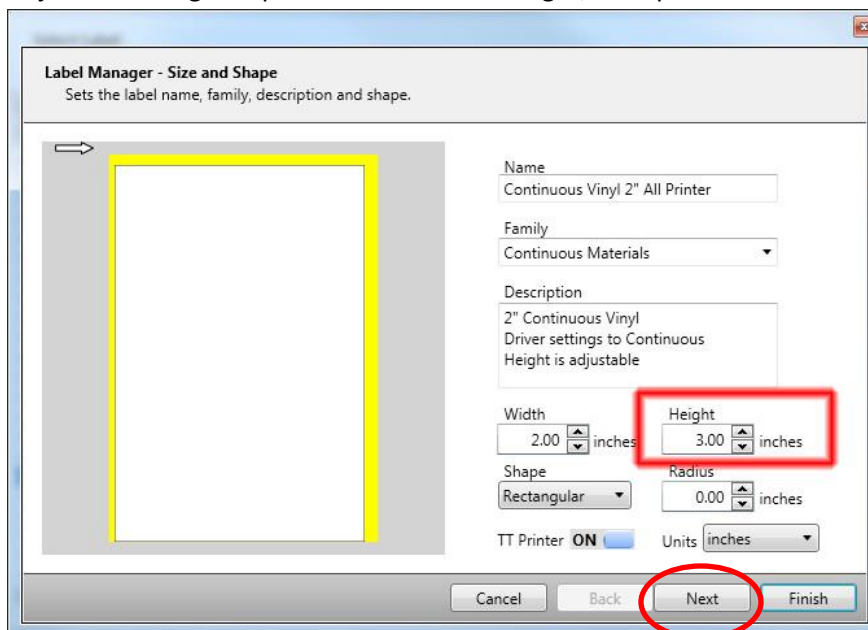

3. Select "Select Label" from the Label Design Guide window

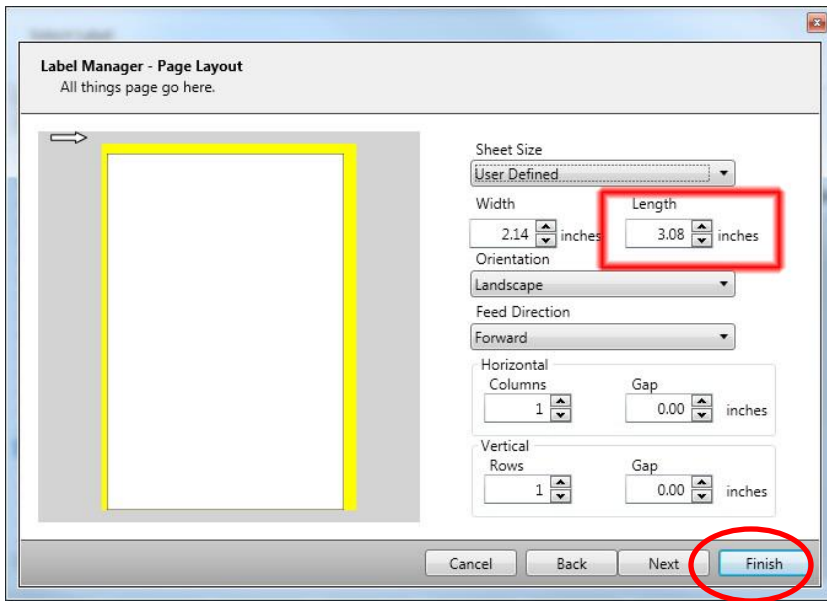

4. Select “Continuous Materials” from the “Family” drop-down menu, select the correct width of the material that you will be using, then select “Edit...”

5. Adjust the “Height” option to the desired length, then press “Next”

6. Adjust the “Length” option to the desired length, then press “Finish”

7. Select “Ok” to overwrite the template

8. Select "Ok" on the Label Design Guide window
